19 6, as amended in this division of this Act, is repealed, unless
20 that Act or another Act specifically provides otherwise.

21 Sec. 15. EFFECTIVE DATE. This division of this Act takes
22 effect January 1, 2021.

23 EXPLANATION

24 The inclusion of this explanation does not constitute agreement with
25 the explanation's substance by the members of the general assembly.

26 BIOFUELS TAX CREDIT AND REFUND EXTENSIONS. This bill
27 extends the expiration date of four biofuel tax programs from
28 January 1, 2018, to January 1, 2025, including three income tax
29 credits and one sales and use tax refund.

BIODIESEL FUEL TAX CREDIT — INCREASED TAX CREDIT RATE FOR
B-11 OR HIGHER. Beginning January 1, 2018, the bill decreases
the designated tax credit rate for the sale of biodiesel
blended fuel classified as B-5 or higher but not as high as
B-11 from 4.5 to 3.5 cents per gallon and correspondingly the
designated tax credit rate for the sale of biodiesel blended

1 fuel classified as B-11 or higher is increased from 4.5 cents
2 to 5.5 cents per gallon. The bill also provides that the
3 department of revenue is required to adopt rules to account for
4 errors in the blending of diesel fuel and biodiesel.

5 BACKGROUND. A biofuel is a substance blended with motor fuel
6 (gasoline or diesel fuel) and includes either ethanol (ethyl
7 alcohol) or biodiesel (a substance derived from vegetable
8 oils or animal fats) meeting state standards (Code section
9 214A.2). A motor fuel blended with a biofuel is referred to
10 as a renewable fuel. The amount of the tax credit or refund
11 is claimed by a taxpayer on a tax or calendar year basis after
12 multiplying the total gallonage of a qualifying renewable fuel
13 or biofuel times a designated monetary rate.

14 CURRENT INCOME TAX CREDITS. The income tax credits may
15 be claimed by a retail dealer operating a retail motor fuel
16 site and the amount of each tax credit is based on the total
17 number of gallons of a renewable fuel sold. The E-15 plus
18 gasoline promotion tax credit requires an ethanol content of
19 between 15 and 69 percent per gallon and the designated rate
20 equals 3 cents except between June 1 and September 15 when
21 the designated rate increases to 10 cents. The E-85 gasoline
22 promotion tax credit requires an ethanol content of between
23 70 and 85 percent per gallon and the designated rate equals
24 16 cents. The biodiesel blended fuel tax credit requires a
25 biodiesel content of at least 5 percent per gallon (B-5) and
26 the designated rate equals 4.5 cents.

27 SALES AND USE TAX REFUND. The sales and use tax refund may
28 be claimed by a biodiesel producer who manufactures biodiesel
29 for use in biodiesel blended fuel. The amount of the refund
30 equals the total number of gallons of biodiesel produced during
31 each calendar year quarter multiplied by a designated rate
32 of 2 cents. However, a producer cannot claim the refund on
33 more than 25 million gallons produced at any one manufacturing
34 facility.

35 FUTURE REPEAL OF REFERENCES TO THE ETHANOL PROMOTION TAX

1 CREDIT. The bill amends Code sections creating the E-85
2 gasoline promotion tax credit and the E-15 plus gasoline
3 promotion tax credit by repealing references to another tax
4 credit referred to as the ethanol promotion tax credit claimed
5 by a retail dealer who attains a certain threshold number of
6 all biofuels sold during a determination period and which is
7 based on the number of gallons of pure ethanol sold during that
8 period. The amendments become effective on January 1, 2021,
9 which is the date that the ethanol promotion tax credit is due
10 to expire.
